Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-23 and 26-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. After careful examination of the drawings and the disclosure of the invention Examiner is not convince that the disclosure would in fact support the claims as amended specifically the limitation and argument over the limitations of “acquiring, by communication between a second-network print system component and , said local print system component, printer data for a plurality of second-network printers located in a second network wherein said plurality of second- network printers are not directly accessible to said local print system component” it seems that Lobiondo would in fact disclose the invention and further more the disclosure fails to clearly disclose the claims as amended.
